

*If your warehouse or DC
is picking orders like this...
then you have problems!*

INTRODUCING **PALLETPAL** Walkie

The PalletPal Walkie is a passive spring actuated level loader making loading pallets faster, safer and easier.

This simple, automatic, load leveler uses a calibrated spring to lower the load as cases, boxes or cartons are added. No power supply is required. No modifications or special

attachments are required – fits all standard electric walkies and walkie riders. Pallet loads up to 4,500 lbs. can be handled.

PALLETPAL»Walkie

Say goodbye to the back breaking woes of warehouse order picking

Model: Walkie mobile level loader

Capacity: 4500 lbs. providing auto level loading for loads ranging from 400 lbs. to 2200 lbs.

Platform: 38" wide x 45" long with special non-slip finish to retain pallets from sliding. Platform includes inset relief along each 45" long side for operator footing on base.

Baseframe: 33" wide x 46" long with special reinforced fork pockets to engage and position on the forks of an electric walkie or walkie rider. Includes non-skid surface along both 46" long sides to accommodate a step area for the operator.

Extended Height: 31" top of platform to bottom of base (no load).

Compressed height: (fully loaded) 9-3/4" top of platform to bottom of base. 4" Base height. 5-3/4" top of platform to top of base.

Finish: Red base and legs, platform is black non-slip epoxy with high visibility yellow edge.

Warranty: Lifetime warranty on calibrated spring. Parts and labor are cover for one year.

Weight: 360 lbs.

The specially designed base-frame has generous tapered openings at each end to receive the forks of all standard electric walkies. That means easy pick-up and drop off without binding and the Walkie, loaded or empty will not slip once on the forks.

A simple intuitive retrofit tool to help make work faster, safer, and easier

Celebrating 125 Years
SOUTHWORTH
making work faster, safer, and easier since 1890

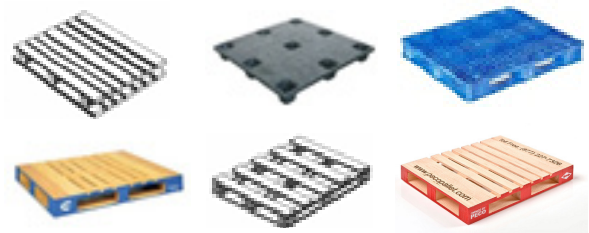

Upgrade your existing fleet and immediately receive the benefits of higher output, fewer lost time injuries and a more committed workforce

**Increases Productivity
Reduces Damage and Waste
Reduces Fatigue
